Please read before using this video game or allowing your children to use it. Some people are susceptible to epileptic seizures or loss of consciousness when exposed to certain flashing lights or light patterns in everyday life. Such people may have a seizure while watching certain monitor images or playing certain video games. This may happen even if the person has no medical history of epilepsy or has never had any epileptic seizures. If you or anyone in your family has ever had symptoms relating to epilepsy (seizures or loss of consciousness) when exposed to flashing lights, consult your doctor prior to playing. We advise that parents should monitor the use of video games by their children. If you or your child experience any of the following symptoms: dizziness, blurred vision, eye or muscle twitches, loss of consciousness, disorientation, any involuntary movement or convulsion, while playing a video game, IMMEDIATELY discontinue use and consult your doctor.

**Precautions To Take During Use**
- Do not stand too close to the screen. Sit a good distance away from the monitor, as far away as the length of cable allows.
- Avoid playing if you are tired or have not had much sleep.
- Make sure the room you are in is well lit.
- Rest for at least 10 to 15 minutes per hour while playing a video game.

**Installation**

Quit all applications and close all windows on your desktop.
Place the Hitman 2: Silent Assassin CD in your CD-ROM drive.
Upon closing your drive the Hitman 2 installation menu will appear.
If AutoPlay is disabled the menu will not appear, to manually access the installation menu follow these simple instructions:
Double-click on the ‘My Computer’ icon on your desktop, and then double-click on the CD-ROM icon that appears in the newly opened window. Finally double-click ‘autorun.exe’ to open the installation menu.

From this point please follow the on-screen prompts to guide you through the installation process.

At the completion of Installation you will be presented with the options to: Launch the game, quit without playing the game or read the Readme text file. Refer to the Readme file for updates, manual alterations and troubleshooting.

**Uninstalling Hitman 2: Silent Assassin**

If you need to un-install Hitman 2: Silent Assassin, you may do any of the following 3 things:

1) Insert the CD into the CD-ROM drive to activate the AutoPlay feature. This will bring up the Launch Panel. Click on the Un-install option and follow the onscreen prompts.

2) Click on the START button from the Windows taskbar. Choose PROGRAMS from the pop-up menu. Locate the Hitman2: Silent Assassin shortcut menu within this group, click on the Un-install option and follow the onscreen prompts.

3) Go to the Control Panel and choose Add/Remove Programs. Click on Hitman 2: Silent Assassin, select the Add/Remove button and follow the onscreen prompts. If you are experiencing difficulties un-installing Hitman 2: Silent Assassin, please consult the Troubleshooting and Performance Issues section of the ReadMe File.
You're back. Are you prepared? The past is about to catch-up with you.

You.

The hired-gun with a sense of loyalty; the assassin with a sense of justice. And faith? What of faith? Trust in God, but carry a loaded gun.

Bind yourself with mastery of weapons, and thoroughness of groundwork. Know when to hold your fire - when to just kill time. And when to strike.

Track down those that force you out of retirement. Seep through the deep fractures of the world. Flow through the quarters of sin, crime, greed and dishonour. Be certain 47, in such places your enemies will hide. At first. Until the only safe place is behind you.

You watch your back, number 47.
Sicily

Spring comes early to the Gulf of Castellammare. The citrus groves west of Palermo are already in fruit by the end of February, and the Sicilian air is rich with the scents of lemon and orange. From the sea, hillside villages are splashes of pastel jewellery on a brilliant carpet of green and gold. The dome of the church of the Carmine rises above the awnings of local market stalls, where even-handed traders toil and prosper.

Yet above it all, the grasping shadow of the Cosa Nostra lengthens.

Ominous.

Merciless.
St Petersburg

Once called Leningrad, this old city has seen more than its share of bullets and betrayal. Expect guards, criminals and soldiers here to be well equipped, experienced and highly suspicious. Old Communists vie with corrupt Capitalists for control of the wide-open boulevards, where few can hide - least of all foreigners.

This is difficult terrain, even for a trained assassin. Proceed with caution.
Mountains cover three-quarters of Japan, with the larger ranges running through the centre of the Japanese archipelago like a spine.

Towering above a beautiful lake and archaic temple-studded town emerges the sacred mountain of Kurokiyama - an inaccessible site visited only by the occasional Shinto pilgrim.

An ancient, six-story castle, with ceramic tiled hogyo roofing and massive stonewalls, looks down from its strategic position high on the neck of the mountain. A local shogun built it here during the Edo period - it is a fitting setting for a 20th century oyabun like Masahiro Hayamoto. From here he controls his yakuza maneuverings and international arms deals.
Malaysia
Kuala Lumpur, Malaysia. A city running with prosperity, luxury and incredible opportunity.

Populated by a teeming chaos of cultures, it attracts the sharks of organized crime from all over the world. It’s a feeding frenzy.

At the same time, reaching for the skies, spears of sterile office buildings burst out over the new and the ancient populace. And everyone is staking a claim for the future.
Nuristan

In a remote valley, hidden in the Hindu Kush mountain range of Nuristan, lies a secluded citadel. Currently, it's ruled by a local khan, Abdul Bismillah Malik - known as Al-Khabir (The Big Guy) - and his fierce tribe of warmongering mujahedin.

A minaret doubles as a watchtower - overlooking the steppes, hillsides and nearby river. Anyone openly approaching the citadel can be seen for miles. This, and the solid brick walls surrounding the citadel, seems to signal security, but this stronghold has changed hands many times over the centuries. A professional always finds a way.
India

A magnificent, ancient North Indian Palace - complete with marble inlays, glazed tiles, filigree partitions, priceless old wall paintings and gold domes - is flanked by a qila (old fort) and protected by high walls and highly skilled bodyguards - in front, a maze of small shops and bangalas (small houses) gives evidence of riches and prosperity in this otherwise poverty stricken remote region of Punjab in Northern India. Relentless loo (hot dry winds that blow across the plains of North India during summer) keeps this little oasis isolated from the outside world.
System Configuration
The system configuration utility can be launched from within the Hitman 2 group on the Windows Start menu. This utility is used to configure Hitman 2 to take advantage of your GFX hardware as best as possible.

The following options are available.
Resolution: Allows the selection of the desired resolution and those supported by the installed GFX hardware.
Use Hardware Transform and Lighting: Allows you to switch the Hardware Transform and lighting option (if your graphics card supports this option)
Blood: Enable or Disable blood within the game
Save and Launch: All changes will be stored and the game will be launched.
Full Screen: Allows the game to run in a window instead of full screen.

Menu Controls
On all menu screens you make a selection by moving the mouse cursor over the menu option you wish to choose then click the left mouse button to confirm your selection. Alternatively use the arrow (cursor) keys to highlight the menu option you wish to choose then press the ENTER key to confirm the selection. Note if there are more menu options than those visible on the screen, use the up and down buttons to scroll the menu up or down. If you wish to cancel and return to the previous menu then click on the BACK button or press the ESC key.
Click on this option to start a new game.

Choose Difficulty
This menu allows you to select the difficulty level: either Normal (recommended for beginners), Expert and Professional (for more advanced players).

The following save game limitations apply to these difficulty levels:
- Normal: 7 saves allowed
- Expert: 2 saves allowed
- Professional: 0 saves allowed

Load game
If you have saved your game previously it can be accessed from this menu. Select a file from the list of previously saved games stored under the level name, date and time. A file name is displayed for each. Select the file you would like to use, the game is restored at the point at which it was saved.
**Beginning a mission**

**The Laptop Computer Screen**
Hitman uses a Laptop Computer to communicate with the agency that assigns him missions. All information valid to the mission is stored on this laptop and can be displayed at any point during a mission. The laptop also serves as a pre-mission preparation area.

1) **Mission Briefing:** A detailed list of objectives for the mission ahead. All objectives must be carried out to complete the mission.

2) **Satellite map:** Click on this to bring up a plan view of the target area. Important items and information are all displayed.

3) **Target Information:** Information regarding the target and his appearance.

4) **Surveillance footage:** Top secret, recorded footage of key information supplied by Agency.

5) **Missions:** Access a list of your previously completed missions.

**Equip menu**
Displayed before a mission begins, this menu allows you to equip yourself for the task ahead.

1) **Available:** A list of the weapons and equipment that can be taken along for the mission ahead. Click on an item to add it to your inventory.

2) **Equipped:** Lists the inventory of weapons and equipment currently selected for the mission ahead. Click on an item to remove it from your inventory.

3) **Item information:** Highlight an item in either list and its name and description are displayed here.

4) **Image of the currently selected item that can be rotated by clicking on it and rotating the mouse.**

Click the Continue button when you are ready to start the mission.
Beginning a mission

Inventory screen

This can be displayed at any time during a mission by pressing the Inventory button. This menu allows you to manage your inventory.

1) Items list.
2) Weapons list.
3) Item information: Highlight an item in either list and its name and description are displayed here. Various specifications are included for weapons - calibre, clip capacity, length, weight, bullets remaining, and clips remaining.
4) Image of the currently selected item.

Note that the game is paused while the inventory menu is open.
In-game display

1) Health. Shows Hitman’s current health: as he sustains damage and injuries the bar begins to shrink. If the bar dips below 25% capacity it turns red to alert you to Hitman’s predicament.

2) The Threat Meter is displayed in the top left of your screen, under the health bar, and gives an indication of the danger Hitman faces. The more the meter pulses, the higher the danger. The meter can be a very useful tool, and if monitored, can alert you to potential problems such as a failed disguise.

3) Available actions. This is a context sensitive list of choices: it depends on your location, the proximity of objects such as doors, dead bodies, etc. and the currently selected item. If there is only one choice on the list press the ACTION button to perform it. If there are two or more choices then hold down the ACTION button, use the NEXT ACTION or PREVIOUS ACTION buttons to highlight the one you want then release the ACTION button to perform it.

4) Current weapon or item of equipment – if the currently selected item is holstered (i.e. Hitman’s hands are free) then the display here is blank.

5) Ammo remaining in the current clip of the selected weapon.

6) Spare ammo available for the selected weapon.

7) Crosshairs, shows exactly where Hitman is aiming. The size of the crosshairs indicates the accuracy of any shots fired - the larger the crosshairs the wider the grouping of any shots fired. Note, while certain guns are inherently more accurate, there are other factors that have a bearing on accuracy. Sustained bursts of fire, and shooting while moving both have an adverse effect; but standing still, and taking time to aim and squeeze off a short burst will improve the ratio of shots on target.

8) Information, useful information is displayed here, including warnings.

Completing a mission

Once you have made the hit, completed all other objectives and successfully escaped the area then the mission is over. A ratings screen is displayed to show how you performed. The Statistics are presented as a last mission score and an overall score, they are:

- Number of shots Fired
- Close Encounters
- Head shots
- Alerts
- Enemies Killed
- Enemies Harmed
- Innocents Killed
- Innocents Harmed
- Rating
- Time
OPTIONS

The options menu can be accessed from the main menu and the in-game menu. Three sub-menus are available: game controls, graphic options and sound options.

Control Setup

Here you can reconfigure movement and combat controls. Click on any of the following to change its setting.

Button configuration: Here you can assign the different controls to keyboard, mouse or Joypad buttons. To change the mapping click on a command then press the new key or mouse button.

Note. The keys can be reset to their default settings by clicking the reset to defaults option.

Mouse speed: Drag the slider to the right to make Hitman’s direction more sensitive to movements of the mouse.

Invert Up and Down Aim: Allows the user to flip the Y axis, so that pushing up on the mouse looks down and vice versa.
Graphics Options

These options allow you to reconfigure the display settings for optimum performance with your graphics card.

Texture Resolution: Drag the slider to increase the texture quality.

Texture Filter: Either Bilinear (fastest) trilinear (slower) or Anisotropic (slowest).

Draw Distance: Drag the slider right to increase the visible distance.

Object Detail: Drag the slider right to increase the level of detail on objects.

Shadows: Enable or Disable character shadows.

Weather Effects: Enable or Disable weather effects.

Anti-aliasing: Enable or Disable FSAA.

DXT Compression: Enable or Disable texture compression.

Subtitles: Allows the selection of in-game subtitles.

Bump Mapping: Enable or Disable bump mapping (if supported by GFX card)

Gamma Correction: Adjusts the brightness of the screen.

Blood and Gore: Toggles blood on and off.

Sound Options

Here you can reconfigure the sound settings. The top three have sliders to adjust the volume control – simply click on and drag.

Music: Adjust the slider to control the volume of the music.

Speech: Adjust the slider to control the volume of the spoken dialogue.

Effects: Adjust the slider to control the volume of the in-game sound effects.

3D Sound Renderer: Either Directsound or Open AL

EAX: Enable EAX 3D sound

Number of voices: Sets the maximum number of voices played at one time.
Weapons and Equipment

Close Combat
Small, lightweight, and easily concealable, close combat weapons such as knives and the Fibre Wire allow near silent kills. They have their drawbacks though so are only used by real professionals.

Handguns
Light weight and easily concealable, the pistols and revolvers are perfect for close-up kills although they will make a lot of noise unless silenced.

Sub-Machineguns (SMG)
Only just concealable, the Sub-machineguns are perfect for fierce firefights. Be warned though, a high rate of fire can leave Hitman with an empty clip and no more ammo.
**Weapons and Equipment**

**Rifles**
Large and precise, the Rifles are best used over distance. Hitman is only capable of carrying one rifle at a time and this cannot be concealed.

![Image of a rifle](image1.png)

**Shotguns**
The shotgun can have a devastating effect at close range but when used over distance, accuracy and damage is severely reduced.

![Image of shotguns](image2.png)

**Sniper Rifles**
Highly accurate and extremely powerful, the sniper rifle is the definitive long-range weapon. In the hands of a skilled professional, targets can be eliminated in a split second. Positioning, patience and a steady hand are pre-requisites for the snipers role.

![Image of a sniper rifle](image3.png)
**Weapons and Equipment**

**Binoculars**
The binoculars are excellent for spotting targets and planning a safe route through your missions.

**Map**
An essential piece of equipment if you are to find your way around.

**Night Vision Goggles**
The high-tech solution to darkness, although your viewing angle can be severely impaired.
Hints and Tips

• There are numerous different ways to complete a mission. If your plan isn't working try a new approach.

• It is NEARLY ALWAYS possible to make the hit without collateral damage. Maximise your reward by using stealth and resorting only to non-lethal weaponry.

• Use disguises and costume changes to throw off your pursuers and gain access to otherwise inaccessible areas.

• Bullets will pass through most doors and nearly all windows.

• Pay attention to sound. An audible heartbeat and heavy breathing is a sign of danger, the enemy might just be getting suspicious.

• By being cautious and using the 'look through keyhole' feature you can ensure a safe passage through rooms.
